

Tools and Supplies need.

Nail gun with (1-1/4 18-gauge Finished brads nails)

Staple gun with (3/4 18-gauge staples)

Hammer

Wood glue

Impact drill

Makes sure to put Brackets if needed!

• How to assemble.

- First, Open the box and separate your material making sure you have everything to complete the cabinet.
 - You are first going to start with the cabinet side panel and back panel, aligning them together, grab your decks and place your decks into the (3/4 inch) slots. Depending on if it's a base cabinet then there's one deck, if it's a wall then there's two decks.
 - Place the deck and make sure you screw them in with (1inch) screws in the back.
 - Once decks are screwed in, you will place your other side on and align it.
 - Nail down both side panels to the back of your cabinet.
 - Lay your cabinet on its back and grab your face frame. Put wood glue on the back of the frame and lay it on the cabinet aligning everything together.
 - Once you have it on, Staple your face frame on. Only staple from the inside, at a 45-degree angle.
 - After Stapling your face frame, grab your toe kick if it's a base cabinet and nail it down.
 - Once everything is nailed and stapled down than put your doors on using (5/8 inch) screws from the hinge to the door and (1 inch) screws from hinge to face frame, then place your shelving into the cabinet with the shelving pins. Every shelf needs 4 pins.
 - Finally, if it's a base cabinet, make sure you place 4 brackets on each corner top of the base cabinet.
- **How to build a Drawer**
 - Grab the front of the drawer and one of the drawer side pieces and align the dove tails making sure the (1/4 Inch) dados align and hammer and nail together. Flip over and repeat, after placing your drawer deck in, place your drawer back piece and hammer nail it together.
 - Then flip over and place your drawer clips using (1/2 Inch) screws and your finished add your rails to the base using (5/8 Inch) screws.
